In January 2016, a joint trip to Kachout and Ket villages was conducted with the participation of company and community representatives, their NGO advisors, relevant government officials and the CAO. Following the joint mapping exercise, and as demonstrated by HAGL's (Hoang Anh Oyadav's) current Economic Land Concession (ELC) map, which was officially granted on 06 July 2015 and signed by the Provincial Governor of Ratanakiri Province, the Head of Land Management, Urban Planning and Construction Department and the Measuring Team Leader, the parties confirm that the lands of customary use of the villages of Kachout and Ket are now located outside the boundaries of HAGL's current ELC.

HAGL and the villages of Ket and Kachout are continuing discussions, through the CAO-facilitated mediation, in relation to other agreements made in Siem Reap in September 2015, including on the issues of preparation and restoration of damaged roads, bridges and affected water sources; agreement on a long-term grievance mechanism; and to support these communities in their request to obtain communal land title.
